

COLLECTION 2014-15

UK & IRELAND EDITION

WELCOME TO THE NEW JANÉ 2014-15 COLLECTION.

We are proud to be the only nursery manufacturer with over 80 years dedicated to child safety research and development. Our 2014 range builds on this reputation and cannot be matched for style and versatility.

The way forward is to provide flexible, quality travel systems that can literally grow, and adapt, as your family gets bigger. Our design team has thought through every practical detail of our pushchairs to create products that out-perform the competition.

JANÉ prams and car seats are a smart investment because they last for years and offer your baby exceptional comfort. And you won't be disappointed with the 2014 colours which are muted, elegant and striking- complementing our urban pioneering designs.

For more information contact our team on (028) 9084 9045 or visit our UK website: www.johnstonprams.co.uk

PRO-FIX SYSTEM GENERATION

PRO-FIX SYSTEM GENERATION

The new and ergonomic Pro-fix system means that all of the Jané carrycots and infant car seats can easily be fitted onto, or taken off, the Isofix platform or pram chassis. With just one movement, and two fastening points, you can fit any component onto the chassis without the need for awkward "fitting kits".

1. INSTALLATION: To fit the infant car seat or carrycot onto the chassis you just need to make one vertical movement and position it in the slots of the two fastening points without needing to do anything else to the chassis.

2. DETACHING: To detach it, pull the two buttons on the sides and with just one movement the infant car seat or carrycot will be released from the chassis or Isofix platform in the car.

3. HANDLE AND FOLD DOWN HOOD: Use the two buttons to choose between the 4 different positions.

HISTORY

THE FIRST JANÉ PUSHCHAIR WAS CREATED IN 1932

The son of Ramón Jané Caúm, Manel Jané Vidal, changed the direction of the business when his son was born. "If you're such a good locksmith, if you've got so many ideas for other people, prove you've got them for your son as well". Encouraged by his father, Manel Jané accepted the challenge and, a few days later, little Ramón went out on wheels, in a buggy that Manel Jané was very proud of.

The admiration it caused among neighbours and friends inspired him to make a couple of folding pushchairs and present them in department stores in Barcelona. A week later he got his first orders. Jané began to make folding pushchairs for children. That's how our story began, with a commitment to excellence, as if we were creating products for our own baby.

1932

81 years committed to your baby.

1939

Jané created and patented the most compact folding chassis on the market.

1967

The first folding stroller from Jané with a vinyl bassinet.

1978

The umbrella stroller, a new concept in reclining and folding strollers.

CRASH TEST

JANE'S WORLD-LEADING CRASH TEST AND RESEARCH CENTRE

Since 1932 Jané has constantly reinvested in research and development. This philosophy has led to the creation of the Jané Crash Test Research Centre, the only private test laboratory in Spain for child safety research. Unlike other brands, our crash test centre is based in-house at our factory in Palau-Solità i Plegamans (Barcelona). This means we can constantly test and retest our products on a daily basis. And that's how we can offer you the most tested seats on the market with the strictest certification of Europe.

Our crash testing facility is simply exceptional, setting new standards and consistently pioneering breakthroughs in child safety. We are proud that safety is embedded in the DNA of the Jané brand and for over ten years the centre has been committed to ensuring our products are simply the safest and most advanced on the market.

The Research Centre has recently had an upgrade to future-proof all our operations and ensure that we continue to create products that are innovative and offer the best protection and health benefits for babies and children. All our high-speed testing is carried out according to ECE Regulations.

5346X-R72 PEACOCK

WHY BUY ME:

- Large roomy seat unit for your growing child.
- Very compact book type folding, even with seat unit still attached.
- Large easy access shopping basket.
 - Seat unit faces either direction.
 - Dual action handbrake.
- Seat and footrest reclines to lie-flat.
 - Pro-Fix system (patented) locks and unlocks car seats with just one movement, eliminating the need to use awkward fitting kits.

muum

YOUR LIFE CAN BE EASIER AND BETTER.

The Jané Muum is a new concept in pushchairs that combines the latest design trends with the most innovative safety and comfort features. It has a light-weight chassis and folds without having to remove the seat.

Adaptability is key to this excellent pushchair, which converts easily thanks to Jané's Patented Pro-Fix system which locks and unlocks the carrycot or car seats with just one movement. The seat has 3 recline positions and is versatile enough to suit newborns right through to toddlers. And it's extremely comfortable due to its larger seating area when compared to most models on the market.

Keen to make life as easy as possible for busy parents the Jané Muum features a large shopping basket so you

can carry everything you need effortlessly, a reversible seat unit so you can have your baby facing you as you walk and smaller lighter swivel front wheels with independent suspension which are perfect for getting about on the city streets. Large removable rear wheels make the pushchair fold up even more compactly, making it easier to carry and store wherever you decide to take it.

One feature parents will love is the handle bar brake lever. You flip the brakes on and off using your right thumb - there's no foot-operated brake pedal to threaten the toenails of sandal wearers.

The new Muum from Jané makes everything not only better for you but also easier and more accessible. Your life can be even better, in every way.

MUUM TECHNICAL

TECHNICAL CHARACTERISTICS

A Pro-Fix system (patented) locks and unlocks car seats with just one movement, eliminating the need for awkward fitting kits. **B** Book type compact folding system with carry handle. **C** 3 Position, full reclining lie-back seat unit with adjustable foot-rest. **D** Handle brake: Flip the brakes on and off using your right thumb, so there's no foot-operated brake pedal to threaten your good shoes or the toenails of sandal wearers. **E** New Lockable front swivel wheel system that's smoother and easier to control. **F** Height adjustable soft touch ergonomic handlebar, 7 positions (78-108cm). **G** Independent front suspension. **H** Quick release rear wheels for more compactness when folded. **I** Removable and washable seat upholstery. **J** Large capacity shopping basket included. **K** Removable and reversible seat. **L** Fully adjustable hood with 2 visor positions. **M** 100% aluminium tubular chassis that free stands when folded. **N** Reinforced seat unit with a honeycomb structure means it's lightweight and strong. **O** Seat has a carrying handle which makes it easier to carry when folded.

NEW

WHY BUY ME:

- New tubular aluminium chassis that makes it more hard-wearing.
- Extremely compact patented folding system, 10% more compact.
- Independent, long travel suspension with 2 shock absorbers for rough roads.
- New PU tyres that are 10 times more hard-wearing than traditional tyres.
- Double brake lock on the handlebar.
 - Seat faces either direction.
- Higher seat unit means it can be used as a highchair when out and about.
 - Pro-Fix system (patented) locks and unlocks car seats with just one movement.

EPIC

NEW
MODEL

THE LATEST PUSHCHAIR FULL OF NEW TECHNICAL ADVANCES, THAT'S EPIC.

Sporty, compact and dynamic are the three adjectives that define the new Epic from Jané. Its urban and pioneering design stands out because of its tubular chassis that gives it a hardwearing and innovative character.

Additionally, Epic offers extraordinary versatility: hardwearing PU tyres with shock absorbing properties; independent, long travel suspension on the rear wheels; excellent manoeuvrability thanks to the balanced front wheel set giving smooth, precise turning, a double brake lock and more compact folding with the detachable and reversible seat.

The new tubular chassis made of aluminium with a high elastic limit, makes it one of the lightest pushchairs in its category. Carefully designed, right down to the last detail, Epic also includes a practical cover for the handlebar so it doesn't wear out from the continual use of the pushchair, and it also gives it a very personal touch.

Like all the Jané pushchairs, Epic offers all the characteristics and features typical of the brand: lightness, smooth handling, comfort for the baby, pro-fix system and a unique design. Epic is a great pushchair full of new developments!

WHY BUY ME:

- World's most evolutionary pushchair.
- Specially designed to grow with your family.
- Lightest and most compact system in its class in the world.
- Adaptable for twin or single pushchair, pram or travel system use.
- New PU tyres that are 10 times more hard-wearing than traditional tyres.
 - Dual action handbrake.
- Compatible with the most innovative travel system options in the world.
 - Isofix travel system compatible.

TWONE

NEW
2014
MODEL

THE WORLD'S MOST EVOLUTIONARY PUSHCHAIR THAT GROWS WITH YOUR FAMILY

The Jané Twone's new evolutionary and convertible design allows it to adapt to many different combinations; you can change it from a one-seater pushchair to a travel system or even a twin pushchair in just a few seconds! It offers great versatility when connecting infant car seats, carrycots and seats units that are all fitted easily thanks to the Pro-Fix system.

The Jané Twone is extremely compact and multifunctional, specially designed to grow with your family whether you have one child, twins or children of different ages. Personalise it however you like and you'll discover many surprising combinations!

In single mode it features a large shopping basket so you can carry everything you need effortlessly, a reversible seat unit so you can have your baby facing

you as you walk, and smaller lighter swivel front wheels with independent suspension which are perfect for getting about on the city streets. Its compact book type folding system makes it easier to carry and store wherever you decide to take it.

The Jané Twone converts to a twin by simply adding the secondary lower seat unit (optional accessory) onto the rear wheels. This seat unit, like the front seat unit, has three different recline positions for your baby. And for different ages, or for newborn twins, you can decide on the different infant car seats and carrycots available.

It's compatible with the new Koos, Strata, Rebel Pro infant car seats, and the award-winning Matrix Light 2 car seat that converts into a carrycot.

TWONE TECHNICAL

TECHNICAL CHARACTERISTICS

A Pro-Fix system (patented) locks and unlocks car seats with just one movement, eliminating the need for awkward fitting kits. **B** Book type compact folding system. **C** Handle brake- so there's no foot-operated brake pedal to threaten the toenails of sandal wearers. **D** New lockable front swivel wheel system that's smoother and easier to control. **E** Height adjustable soft touch ergonomic handlebar with 7 positions (79 -108 cm). **F** Independent front suspension. **G** Detachable rear wheels with protective mudguards. **H** Bumper bar. **I** Removable and washable seat upholstery. **J** New larger capacity shopping basket. **K** Main seat unit is removable, reversible and has 3 recline positions with adjustable footrest. **L** LowerPro-Fix mountings for the installation of the optional lower pushchair seat unit or infant car seat / carrycot. **M** Fully adjustable hood. **N** 100% aluminium tubular chassis. Free stands when folded. **O** New PU tyres that are 10 times more hard-wearing than traditional tyres and with great shock absorbing properties. **P** Unique swing gate bar making it easier to install the additional lower seat unit or child. **Q** New foot apron that zips away into the bumper bar when not in use.

RIDER

FUTURISTIC RIDER GOES STRAIGHT INTO POLE POSITION

An ingenious and innovative patented folding system ensures that when the Jané Rider folds, the unique retractable rear wheels reduces the folded size by an extra 30%. This makes the Jané Rider the most compact model of its kind on the market.

This exciting new system guarantees maximum comfort for baby. Its adjustable rear suspension with shock absorber can be altered according to the child's weight – harder or softer.

Another great feature of the Jané Rider is that the seat is reversible. This means that it can be fitted onto the

chassis in two different directions, with baby facing you or facing ahead. Recent research from the University of Dundee (Scotland) and the National Literacy Trust shows that if your baby is facing you, you are twice as likely to talk together and this helps develop your baby's speech.

The Jané Rider has a streamlined chassis with a unique inverted 'C' shaped structure making it easier to push. Because there's no obstructive rear axle for feet to kick against, taking baby for a walk is a breeze, keeping you in pole position.

RIDER TECHNICAL

TECHNICAL CHARACTERISTICS

A Pro-Fix system (patented) locks and unlocks car seats with just one movement, eliminating the need for awkward fitting kits. **B** Rider has a patented folding action that reduces the folded size an extra 30%. **C** Seat unit faces either direction in two easy clicks. **D** Multiple position reclining backrest and footrest. **E** Lightweight anodized aluminium tubular chassis. **F** Higher seat unit keeps baby above the pollution, car fumes and allows it to be used as a highchair when out and about. **G** Wheels with steel ball bearings to maximize manoeuvrability. **H** Height adjustable, soft touch handlebar (85- 110 cm). **I** Quick release removable rear wheels for compactness. **J** Lockable front swivel wheels. **K** Unfolds with just one hand. **L** Shopping basket included. **M** Handle bar brake lever, so there's no foot-operated brake pedal to threaten your good shoes or the toenails of sandal wearers. **N** Inverted "C" shaped rear structure leaves more room for your feet, making it noticeably easier to push. **O** Adjustable suspension with central shock absorber, this absorbs the shocks to baby produced by rough road surfaces, improving your baby's comfort. **P** Bumper bar with removable washable cover.

WHY BUY ME:

- Minimalist style but with all the benefits of an extreme design.
- Adjustable suspension with shock absorber offers baby maximum comfort.
 - Large deep seat unit and hood.
- Puncture-proof all-terrain wheels with PU tyres.
 - Dual action handbrake.
 - Higher seat unit means it can be used as a highchair when out and about.
- Compatible with the most innovative travel system options in the world.
- Multi award winner, including the Which Best Buy.

TRIDER

THE ALL-TERRAIN WITH SHOCK ABSORBER TAKES ROUGH WITH SMOOTH

The Jané Trider lets you enjoy your trips out with complete freedom. It offers you a chassis with minimalist style but with all the benefits of an extreme design.

The three large high performance puncture-proof rubber wheels are perfect for adapting to any terrain and surface, and the front wheel swivels to give maximum freedom of movement. The brilliant long length suspension stroke with adjustable shock absorber, offers the baby maximum comfort.

It has a handle bar brake lever, so there's no foot-operated brake pedal to threaten the toenails of sandal wearers and its seat unit is reversible, so baby can enjoy his trip out facing the street or travelling backwards, facing his parents. The higher seat unit

means it can also be used as a high chair, as it adapts perfectly to the table top. This carefully studied position of the seat is also ideal for your child's health as it keeps him away from pollution, car fumes and insects in long grass when off road.

Its extremely compact folded size, and the lightness of the aluminium, make it easy to take anywhere like the rest of the Jané range, the Jané Trider is fitted with the Pro-Fix system (patented) which means its carrycots and car seats can be connected quickly and safely with just one movement - unlike most prams on the market which require awkward fixing kits. With Jané everything is integrated into the system, so with the simple press of a button your travel system can be transformed.

RAINCOVERS PUSHCHAIR & CAR SEATS

The Jané range of practical raincovers will keep your little one protected and comfortable while you're on the move. These exclusively designed raincovers help to protect against the wind, rain, and are uniquely designed to aid air circulation and prevent temperature build-up with the mesh and roll up windows; perfect when going into shops when taking a wet raincover off is not practical. These raincovers are quality accessories that are reinforced with mesh to prolong their life. Practical storage bag with Velcro straps is also included with most models.

SURFER UNIVERSAL PLATFORM

The Jané Surfer has been specially designed to adapt to your Jané pushchair, ensuring a much simpler, quicker and safer assembly than any other platform. Being universal it fits quick and easily onto any pushchair. Technical characteristics: suspension, wheels with ball bearings, base made from ultra-resistant plastic and aluminium, and a safety lock. There are quick release mechanisms for detaching from the pushchair, or, as with most models, just fold with your pushchair. Suitable for children up to 20 kg.

KANGAROO BABY CARRIER 0-15 HG

This comfortable carrier spreads the weight between the hips and the back. This helps the baby's hips to develop correctly. Suitable from birth to 2 years (3.5 - 15kg). It features wider straps to distribute the weight evenly and an adjustable harness system that allows for easy opening, making it stress-free to load baby. The sitting area can be individually adjusted to allow for an optimal fit and a choice for Baby's legs to be held against the adult's hip or their legs hanging down. Its adjustable head support can be folded down so your child can be carried facing forward when they are a bit older and able to hold up their own head.

TRANSPORTER 2
EUROTEST 2011

TRANSPORTER 2

FOR MAXIMUM SPACE AND COMFORT - THE WORLD'S SAFEST CARRYCOT

Transporter 2 is the carrycot from Jané that is the most comfortable and safest in its category. Continuous research and development means that structurally and technically it's a market leader in its class.

The Jané Transporter 2 is not just a carrycot, but also a Group 0 lie-flat restraint system which is especially recommended by health officials for longer journeys. Newborn babies should ideally lie completely flat as this position facilitates newborn respiration, nurtures the abdomen and aids optimal spinal development. The Transporter 2 recognises this important requirement and gives your child the best start in life.

Its honeycomb structure gives maximum rigidity and resistance with minimum weight while the full

polystyrene inner lining provides maximum absorption qualities.

The new seat belt fasteners, which are easier to use, prevent the carrycot from rotating and it also has the 'misuse' system which prevents the carrycot being installed incorrectly in the car with the seat backrest raised.

With regards to comfort, its adjustable ventilation system with membrane fabric offers better breathability by regulating the air flow, creating a pleasant temperature for your baby. Its backrest can be reclined in various positions from a button on the outside, ensuring that your baby is always as comfortable as possible.

TRANSPORTER 2 TECHNICAL

TECHNICAL CHARACTERISTICS

A Can be used as a lie-flat car seat. **B** Unlike conventional infant car seats this lie-flat auto carrycot doesn't have any time restrictions, meaning a newborn can travel in it for longer journeys nonstop. **C** Can be used for overnight sleeping when used with a mattress.

D New easier seat belt fasteners prevent the carrycot from rotating and its misuse system prevents incorrect installation. **E** Integral shock absorbing material offers 360° protection. **F** 3-Point safety harness keeps your baby safely in place. **G** Easy one-pull harness adjustment. **H** Its Reinforced honeycomb structure reduces weight for carrying and maximises structural integrity. **I** Adjustable backrest is reclined from an outside lever so not disturbing baby when they fall asleep. **J** Breathable materials and the ventilation system maintains a comfortable temperature for baby. **K** Pro-Fix system locks and unlocks it from the pram with just one movement, eliminating awkward fittings kits. **L** Soft, padded covers, easy to remove and wash. **M** Two position Carrying handle. **N** Smartphone QR barcode for in car fitting video.

MATRIX LIGHT 2

WHY BUY ME:

- The first evolutionary Group 0/0+ in the world.
- The only car seat on the market with no time limits.
- Can be used as a lie-flat or sitting-up infant car seat in the car.
- The healthiest car seat for newborns on the market.
- More spacious model allowing baby to travel in the safer rearward facing position for longer.
- Pro-Fix system (patented) locks and unlocks car seats with just one movement, eliminating awkward fitting kits.

CONVERTIBLE CAR SEAT AND CARRYCOT

The new multi-award winning Group 0/0+ Matrix Light 2 from Jané is a revolutionary multi-functional infant car seat that turns into a carrycot. The evolution of the award-winning classic Matrix, it is the only infant car seat on the market (patented) that offers the option of safely travelling with your baby in the sitting up or lying down position in the car, especially recommended by health officials for long journeys.

This means that if your baby is sleeping in the Jané Matrix Light in the house he can be safely moved to the car, taken to the shops, and brought back home again without ever having to be moved or disturbed from sleep. It also delivers great value for money as it can be used 24/7 - for overnight sleeping when used

with a mattress, just like a conventional carrycot, and for naps during the day, yet converts effortlessly into a car seat when required - giving you the best of both worlds at a fraction of the price.

HEALTH BENEFITS

Health officials and medical studies agree that to minimise periods of oxygen desaturation, newborn babies should be transported in a lie-flat system which is the healthiest way for them to travel especially on longer journeys. This position facilitates newborn respiration, nurtures the abdomen and aids optimal spinal development. The Jané Matrix Light recognises this important requirement and gives your baby the best start in life.

- It's a more spacious design that lasts longer than conventional infant car seats.
 - Safer 5-Point safety harness.
- Low-routing for belt fitting leaves more room for baby's feet.
- Fully synchronised harness and headrest height adjustment system.
- Easy to belt fit or with the Isofix platform you can click and go.
- Pro-Fix system locks and unlocks car seats with just one movement. Eliminating the need to buy awkward fitting kits.

★★★★★
STRATA
 EUROTEST 2008

STRATA

THE SAFEST CAR SEAT IN ITS CATEGORY - EUROTEST 2008

Strata by Jané has obtained the maximum score in Group 0+ car seats installed with the adult 3-point seat belt in the European test performed by child safety experts and consumer organizations (EuroTest 2008, Which? Magazine in UK - Best Buy). So it is not just the safest car seat, but also the only one that helps pulmonary development.

This more spacious infant car seat not only allows baby to travel more comfortably but also to travel in the safer rearward facing position for longer, up to 13kg, 18 months approx.

The baby's headrest has double protection; thanks to its automatically adjusting headrest and the Strata's shell (made of recyclable, high resistance polypropylene). The entire surface that comes into contact with the

baby is protected with shock absorbing material.

The incorporated 5-point harness allows for a larger fastening surface, and therefore provides a higher level of safety when compared to the traditional 3-point harness that's found on most infant car seat.

The Strata Platform is an accessory which has been specially designed to make it even easier to install the Strata in your car. It uses the Isofix system in your car and Jané's patented Pro-fix system on the Strata to make it the safest, easiest and quickest way to install the car seat in the car or travel system. A unique and handy smart phone QR barcode also delivers an in car video demonstration to avoid user errors. Jané was the first car seat manufacturer to use this innovative technology.

STRATA TECHNICAL

TECHNICAL CHARACTERISTICS

A More spacious model: allows baby to travel in the safer rearward facing position for longer. Up to 13 kg / 18 months approx. **B** Officially the safest car seat in its category - Independent crash tests EUROTEST 2008, Which? Magazine- BEST BUY. **C** Universal: can be installed even in cars with shorter seat belts: its low-routing system leaves the area for baby's feet free. **D** Can be installed with seat belts or optional Isofix Platform. **E** 5-Point safety harness allows for a larger fastening surface, and therefore provides a higher level of safety when compared to the conventional 3-Point harness that's found on most infant car seats. **F** Automatic height adjustment of the shoulder straps by simply pressing a button avoids user error and the inconvenience of removing and refitting the harness as baby grows. **G** Automatic height adjustable headrest offers double protection. **H** One-pull harness adjustment. **I** Seat belt lock, so it can be tightened to give more stability. **J** Pro-Fix: locks and unlocks car seat with just one movement. **K** Removable hood for protection against the elements. **L** Air circulation system for your baby's comfort. **M** Soft, padded covers, easy to remove and wash. **N** Smart-phone QR barcode for in car fitting videos.

KOOS

Koos Video

BETTER DESIGN, LIGHTER AND SAFER.

Koos is the new solution from Jané for group 0+. Koos is the infant car seat that combines an extremely light-weight shell with maximum safety. Made using breathable materials, Koos is very comfortable for the baby and easy to handle for parents.

The very stable, light structure makes the infant carrier very easy to carry and also makes it safer for the baby. In the event of an impact the displacement is less than it would be in a heavier infant car seat.

The new ergonomic handle lets you change the position quickly, safely and easily. Koos is ideal for travelling but also for going out walking, as it is fitted with the “Pro-Fix” system, meaning that with just one movement, it can be fitted onto your Jané chassis to make a travel system.

KOOS PLATFORM

The fact that installing infant car seats in the car with the seat belt can seem complicated, has led us to develop the new Koos Platform.

The new optional Koos Platform allows for safe, convenient and quick installation as it is completed in just one simple movement. The platform is securely fastened to the vehicle using the Isofix system, which maximises the safety of the Koos infant car seat, since the Isofix system greatly reduces the risk of any installation errors.

The new platform has been designed so it can be left permanently installed in the car, thereby avoiding all the hassle of constantly fitting and removing it.

KOOS TECHNICAL

TECHNICAL CHARACTERISTICS

A Lightest seat in its category, only 2.9 kg. **B** Pro-fix: locks and unlocks the car seat from the pram or Isofix platform with just one movement, no awkward fitting kits. **C** Polypropylene injected body that is very resistant to impacts. **D** All-round protection. **E** Adjustable harness with 3 height positions. **F** Ergonomic padded pillow that supports the neck and body of the smallest babies. **G** Ventilation system that guarantees permanent air circulation. **H** 3-Point safety harness with one-pull adjustment. **I** Ergonomic carrying handle with 4 different positions. **J** Third belt guide. **K** Storage compartment. **L** Removable and washable upholstery. Includes a hood to protect from sun and wind. **M** Correct installation test. **N** Fitted with car seat belt lock so it can be tightened to provide greater stability. **O** New supplement with an expanded polystyrene core that improves the protection in the event of side impact. **P** Smartphone QR barcode for in car fitting videos.

WHY BUY ME:

- Fully recline feature from birth to 4 years.
 - Includes newborn support cushion.
- Best EUROTEST 2005 score, since then it's had continual improvements made to it.
- Well padded for side impact and for extra comfort, has a head hugger and non-slip chest pads.
- Universal classification - easily installs with 3 point seat belt.

RACING

Racing

TWO CAR SEATS IN ONE

The Jané Racing is a Group 0-1 car seat, birth to 4 years of age approx. It's simple to fit and with its side impact protection the Racing gives you peace of mind right from day one.

An ergonomically designed seat, it adapts to the changing needs of a growing child from birth to 4 years (18 kg). The interior has expanded polystyrene lining which is designed to absorb energy in the event of an accident. This seat is particularly noteworthy for its deep impact protection shell, especially around your child's head, and also the adjustable newborn cushion filler which provides the correct posture and maximum comfort for a newborn baby.

The safest way for a newborn to travel in a car seat is rearward facing. In the first stage - group 0, the

Racing car seat can be reversed and can be used from birth. In this rearward facing position, with the aid of a clever foot which descends from its base, it will angle the seat correctly for a newborn baby. Once the seat is fully reclined in this position, it will ensure your newborn is in the correct posture that is essential for his development and comfort.

After this first stage once your baby reaches 9 kg in weight (Approx. 9 months) you can then install the Racing car seat in the forward facing position - group 1. This means that the Racing car seat provides protection with no compromises in the Group 0 and 1, and can be used from birth right up until your child is about 4 years old.

RACING TECHNICAL

TECHNICAL CHARACTERISTICS

A Total trust - Best Eurotest score in Group 0-1 in the European Consumer Associations car seat tests 2005. Since then, it has had continual improvements made to it: non-slip seat belts, non-rocking system, multi recline positions, breathable fabrics. **B** Installation with 3-point seat belt. **C** Anti-swaying system, Lowrider Group 0. Designed so the seat belts anchor as low as possible at the base, and as high as possible at the shoulder. This gives the maximum stability and protection in the event of a crash. **D** Group 0 foot – the height of the base re-equilibrates the position of the car seat. When rearward facing the foot is lowered to increase the comfort and safety of the newborn. **E** New born support cushion included. **F** Height adjustable 5-point safety harness with high-performance non-slip chest pads. Ensuring baby is held firmly in total comfort and increases safety. Complies with ECE R44/04. **G** Multiple recline positions – adjusts without disturbing your child. **H** One-pull harness adjustment. **I** Breathable fabrics allow the body's humidity to be transferred. **J** Cover easily removable and washable.

WHY BUY ME:

- Headrest and harness straps are synchronized, this avoids refitting the harness as your child grows and protects against user error.
- Easy to install by either 3-Point seat belt or Isofix.
 - Multi position reclining seat for additional comfort for sleeping baby.
- Harness tensioning system increases safety.
 - Support leg included.

EXO LITE

NEW
MODEL

A NEW CAR SEAT IS BORN WITH CONVENIENT, EASIER AND SAFER FASTENING.

EXO LITE is the new group 1 car seat from Jané. Exo Lite is now lighter and maximises protection thanks to the inner absorbent material and the large sides that absorb more energy in the event of an impact.

It can be installed easily and safely in the car using Isofix fasteners, which provide the seat with greater stability in the event of knocks or side impacts. Your child is always protected while travelling as it also has a third anti-rotational point or Support Leg included. This support leg limits tilting and rotation in the event of an impact and is easy to install and is compatible with most vehicles.

The Jané Exo Lite is versatile too, as you also have the option to install it with your vehicle's 3-point seat belt, making it easy to transfer between cars and also making it compatible with older cars that don't have Isofix.

With the additional protection of a separate and adjustable headrest, which also correctly adjusts the harness to your child's build or to accommodate thicker clothing from time to time, your child will find it the perfect fit and every parent will find it the easiest to adjust.

EXO LITE TECHNICAL

TECHNICAL CHARACTERISTICS

A Headrest and harness are synchronized and adjust together by moving the headrest. This avoids user error and the inconvenience of removing and refitting the harness as your child grows. **B** Multiple reclining positions – that adjust without disturbing your child. **C** Height-adjustable 5-point safety harness with one-pull adjustment. **D** Non-slip high performance chest pads increase your child's comfort and safety. **E** Installation by either using the adult 3-Point Seat Belt or **F** Installation by Isofix. **G** The included support leg limits tilting and rotation in the event of an impact. **H** Indicators confirm the Isofix hooks are engaged. **I** For easy storage the Isofix arms retract by turning the conveniently placed adjuster at the front. **J** Impact absorbing material throughout the interior of the car seat provides maximum shock absorption and protection for your child. **K** Cover easily removable and washable. **L** Impact approved. Side Impact tested. **M** Certified according to the European Safety Regulations ECE R44/04, number E9-041077. **N** Smartphone QR barcode for in car fitting videos.

- Adjustable head rest with automatic synchronised harness adjustment.
 - Smartphone video fitting guide.

EXO

EXO
EUROTEST 2010

THE SAFETY SEAT WITH 3RD GENERATION ISOFIX

The 3rd Generation of child car seats is here. The EXO by Jané is the first seat that incorporates an advanced pneumatic shock absorber system and the only one with 4 new worldwide patents in safety.

Most safety seats now use the ISOFIX system, allowing the seat to simply fasten to the chassis of the vehicle. ISOFIX devices are much easier to install and minimise the car seat's movement in the event of an impact, reducing the risk of serious injury by up to 22%.

PATENTED SHOCK ABSORBING SYSTEM

Jané's EXO, 3rd Generation ISOFIX, goes a stage further introducing an exclusive Pneumatic Absorption System (PAS) with pneumatic piston that reduces the force of an impact by up to 4 G when compared to conventional ISOFIX car seats.

In the event of an accident, car seats experience G-force. Reducing this in turn reduces the potential G-force to your child, minimising potential injury. The patented shock absorption system does just this, by absorbing a high percentage of the impact to cushion and smooth out the blow. In other words, the G-force is lowered and it is less likely that the child will be injured in an accident.

ELECTRONIC DEVICE TO GUARANTEE CORRECT INSTALLATION

An advanced electronic device detects whether ISOFIX anchorages are properly connected, with both lights and acoustic signals on its front panel. This system tells you if it's correctly installed any time, just by pressing the "TEST" key. If the lights are green, it indicates that it's correctly fitted.

EXO TECHNICAL

TECHNICAL CHARACTERISTICS

A Patented Electronic warning system ensures correct installation. **B** Patented Pneumatic Piston absorbs the energy of an impact and reduces deceleration by up to 4G when compared to conventional Isofix systems, minimising the potential injury on your child. **C** New system for tensioning the harness which reduces the movement of the child in the event of an accident (patented). Harness is tightened by the abdominal straps, while most car seats use the shoulder straps to do this. **D** Synchronized headrest, harness and crotch strap with an easy single-handed adjustment prevents re-threading errors (Patented). **E** Multiple recline seat positions. **F** 5-Point safety harness with one-pull adjustment. **G** Non-slip high performance chest pads increase comfort and safety. **H** 3 installation options available. (A) 3-Point Seat Belt (Universal), (B) ISOFIX and top tether (Universal) or (C) ISOFIX and optional support leg (ideal if top tether cannot be used). **I** Top tether provides a third anchorage point, limiting the rotational movement of the seat. **J** Impact absorbing material throughout the interior of the car seat. **K** Cover easily removable and washable. **L** Smartphone QR barcode for in car fitting videos. **M** Certified to the European Safety Regulations ECE R44/04.

Montecarlo R1
EUROTEST 2012

MONTECARLO R1

ONE OF THE BEST AND SAFEST CAR SEATS ON THE MARKET

The Montecarlo R1 from Jané is specially designed to adapt to each stage of your child's growth. Suitable for children between 15 – 36 kg, this Group 2 – 3 car seat has an integral adjustment system that allows both the seat's height and width to be altered for a perfect fit.

You can extend its usage even further when used with Jané's optional Xtend impact shield, a protective cushion that provides a safe and comfortable alternative to a harness. With the Xtend it can also be used as a Group 1 car seat, effectively extending the seats range from Group 1-2-3, 9 to 36 kg, 9 months to 12 years approx.

This car seat's unique aluminium structure improves protection by 70% when compared to a traditional system and is also equipped with an ISOFIX anchoring system for the base of the seat, which combined with

3-point seat belt, obtaining greater stability.

Offering greater cushioning, the larger wrap around headrest increases shock absorption that's caused by an impact. The reclinable backrest and tilting sides provide optimum support for a restful journey and the aeration vents with the internal fabrics are breathable to maximise your child's comfort.

Montecarlo R1, as with all our car seats, is independently tested and approved under new European Car Safety Regulations ECE R44/04. This excellent seat was also subjected to the strict EUROTEST exam, which tests the safety and resistance of all the child safety seats on the market. It received one of the best scores on the market in its category, and an "excellent mark" with special mention made of its "safety in side crashes" and the "stability of the seat".

MONTECARLO R1 TECHNICAL

Montecarlo R1 & Xtend
Instruction Video

TECHNICAL CHARACTERISTICS

A Adaptable: a Multi-Group Safety Seat that easily adapts to your growing child thanks to its integral adjustment system. **B** Optional Xtend impact shield allows this Group 2-3 car seat to also cater for Group 1. It means the car seat can effectively be used from 9 to 36 kg, approx. 9 months to 12 years old. **C** The seat is anchored to the car via the standard ISOFIX system and the child is secured in the seat with the 3-point seat belt, obtaining greater stability. Can also be installed with just a 3-point seat belt. **D** The aluminium structure improves protection by 70% compared to traditional systems. **E** Height and the width of the sides of both the headrest and the backrest areas are independently adjustable, effectively protecting your child during all stages of growth. **F** Reclining backrest and adjustable armrests for increased comfort and allows installation in a wider range of cars. **G** Maximum protection thanks to the new improved large wrap around headrest and side shock absorption. **H** New updated seat belt route means the diagonal belt of the car adapts perfectly to the height of the child's shoulder. **I** Ergonomic design with ventilation maximises your child comfort. **J** Smartphone QR barcode for in car fitting videos. **K** Indicators confirm the ISOFIX hooks are engaged.
