

**COLLECTION 2015-16**

UK & IRELAND EDITION

# JANÉ®

Designed in Barcelona. Since 1932.

## WELCOME TO THE NEW 2015 COLLECTION

Through the decades JANÉ has established a reputation for producing prams and car seats that are innovative and simply unmatched in terms of their versatility, strength and comfort. JANÉ continues to pioneer ground-breaking developments in child health and safety that place the brand as a market leader, trusted by millions of parents across the globe.

We are delighted to present to you the JANÉ 2015-16 UK collection, highlighting our fantastic award winning collection of prams, travel systems and car seats for your new family.

New this year is the JANÉ Crosswalk. Blessed with the same magical DNA as the Epic, it's the new high performance all-terrain model with a unique lie-flat seat mode that's suitable for new-borns. It has a super-compact folding system and is ultra-smooth and light. Sophisticated in the city and solid in the country, these characteristics make it perfect for all lifestyles.

The range also includes the new Quartz, the new Group 2-3 car seat that can adapt to your child at every stage from 3 to 12 years; our Transporter 2, the healthiest, safest carrycot in the world and the award-winning revolutionary multi-functional Matrix Light 2, which is still the healthiest and safest infant car seat in the world.

With our extensive range of award winning and exciting products, I am sure you will find the ideal solution for all your baby's needs.

## TECHNOLOGY AND RESEARCH AVAILABLE FOR EVERYONE

Jané carries out a lot of social work to help to improve mobility conditions for children.

- We allocate a large amount of our resources to research to provide products that are safer every day.
- We created the JANÉ EDUCA programme to make children aware of the importance of using their safety seats correctly.
- We collaborate with automobile associations to produce and promote multiple studies about child safety.
- We collaborate with UNICEF

## JANÉ, You and UNICEF united against malaria.

At JANÉ we wanted to get involved with the struggle to combat malaria, and we want ALL of you to join us, so that together we can carry out direct and immediate action:

**"With each pushchair that you buy Jané collaborates with UNICEF to supply mosquito nets"**

# HISTORY

## THE FIRST JANÉ PUSHCHAIR WAS CREATED IN 1932

The son of Ramón Jané Caúm, Manel Jané Vidal, changed the direction of the business when his son was born. "If you're such a good locksmith, if you've got so many ideas for other people, prove you've got them for your son as well". Encouraged by his father, Manel Jané accepted the challenge and, a few days later, little Ramón went out on wheels, in a buggy that Manel Jané was very proud of.

The admiration it caused among neighbours and friends inspired him to make a couple of folding pushchairs and present them in department stores in Barcelona. A week later he got his first orders. Jané began to make folding pushchairs for children. That's how our story began, with a commitment to excellence, as if we were creating products for our own babies.

1932

81 years committed to your baby.

1939

Jané created and patented the most compact folding chassis on the market.

1967

The first folding stroller from Jané with a vinyl bassinet.

1978

The umbrella stroller, a new concept in reclining and folding strollers.

# CRASH TEST

## GOING BEYOND THE REGULATORY REQUIREMENTS

Jané moves forward with the confidence coming from experience and the responsibility of leadership. Jané Crash Test Research Center is the safety laboratory of Jané, and one of the most advanced in the world. Ready to perform tests at the same level as EuroNCAP, it lets us carry out all the tests necessary, not only to guarantee maximum safety but also to create new pioneering and innovative designs.

This relentless quest to go one step further is backed up, daily, by the constant investment of Jané's resources in research, safety and the protection of babies.

## PRODUCTS AHEAD OF THEIR TIME

Jané premise is to create products of the future, now. The innovations offered by their design provide a response not only to all the new mothers and fathers, who want the design to suit their baby's delicate shape better and fit in with their lifestyle, but are also backed up by recent medical reports.

# MUUM MORE COMFORTABLE WALKS MORE ENJOYABLE WALKS

NEW  
IMPROVED  
2015  
MODEL

The Jané Muum is a new concept in pushchairs that combines the latest design trends with the most innovative safety and comfort features. It has a light-weight chassis and folds without having to remove the pushchair seat unit. This year's model now includes a new updated larger pushchair hood, a new style foot pedal brake and now also includes coordinating accessories.

Adaptability is key to this excellent pushchair, which converts easily thanks to Jané's Patented Pro-Fix system which locks and unlocks the carrycot or car seats with just one movement, eliminating the need for awkward fitting kits. The pushchair seat has 3 recline positions and is versatile enough to suit newborns right through to toddlers. It's one of the most comfortable models on the market due to its well-designed roomy seat.

Keen to make life as easy as possible for busy parents, the Jané Muum features a large capacity shopping

basket so you can carry everything you need effortlessly. It also has a reversible seat unit so you can have your baby facing you as you walk. Its smaller lighter swivel front wheels with independent suspension, are perfect for getting about on the city streets. And its large removable rear wheels make the pushchair fold up even more compactly, making it easier to carry and store wherever you decide to take it.

Available to co-ordinate with the Muum pushchair are the KOOS – one of the lightest and most innovative infant car seats on the market; the MATRIX LIGHT 2 – the safest, healthiest all-in-one carrycot and car seat in the world, and the MICRO foldable carrycot – the practical and light option for transporting baby whilst he rests.

The Muum makes everything not only better for you but also easier and more accessible. The Muum from Jané; more comfortable walks, more enjoyable walks.

## MUUM TECHNICAL

## TECHNICAL CHARACTERISTICS

- A** Pro-Fix system (patented) locks and unlocks car seats and carrycots with just one movement, eliminating the need for awkward fitting kits.
- B** Book type compact folding system.
- C** 3 Position, ergonomic, full reclining lie-back seat unit with adjustable footrest (suitable from birth).
- D** New foot brake pedal.
- E** New larger wraparound hood.
- F** New height adjustable soft touch ergonomic handlebar, 7 positions (78-108cm).
- G** Lockable front swivel wheels that's smoother and easier to control.
- H** Independent front suspension.
- I** Quick release rear wheels for more compactness when folded.
- J** Removable and washable seat upholstery.
- K** Large capacity shopping basket.
- L** Removable and reversible seat unit.
- M** Reinforced seat unit with a honeycomb structure means it's lightweight and strong.
- N** Lightweight aluminium chassis can free stand when folded.
- O** Chassis can fold with seat unit attached and has a carrying handle which makes it easier to carry.

Matrix TV Advert

# EPIC A UNIQUE PUSHCHAIR

Sporty, compact and dynamic are the three adjectives that define the new Epic from Jané. Its urban and pioneering design stands out because of its tubular chassis that gives it a hardwearing and innovative character.

Additionally, Epic offers extraordinary versatility: hardwearing PU tyres with shock-absorbing properties; independent, long travel suspension on the rear wheels; excellent manoeuvrability thanks to the balanced front wheel set giving smooth, precise turning; a double hand brake lock and a more compact patented folding chassis with the detachable and reversible seat.

The new tubular chassis, made of aluminium with a high elastic limit, makes it one of the lightest pushchairs in its category. Carefully designed, right

down to the last detail, Epic also includes a practical cover for the handlebar so it doesn't wear out from the continual use of the pushchair, and this also gives it a very personal touch.

Available to coordinate with the Epic pushchair is the KOOS – one of the lightest and most innovative infant car seats on the market; the MATRIX LIGHT 2 – the safest, healthiest all-in-one carrycot and car seat in the world, and the new NANO foldable carrycot – the practical and light option for transporting baby whilst he rests.

Like all the Jané pushchairs, Epic offers all the characteristics and features typical of the brand: safety, lightness, smooth handling, comfort for the baby, a pro-fix system and a unique design. Epic is a great pushchair full of new developments!

## EPIC TECHNICAL

## TECHNICAL CHARACTERISTICS

- A** Pro-Fix system (patented) locks and unlocks car seats and carrycots with just one movement, eliminating the need for awkward fitting kits.
- B** Patented folding system, 10% more compact.

# CROSSWALK

NEW  
DUE SPRING  
2015

## CHIC IN THE CITY STRONG IN THE COUNTRY

Equipped with the same DNA as the Epic, the new Crosswalk is born! It's the new high performance all-terrain pushchair with a patented compact folding system. Sophisticated in the city and solid in the country, these characteristics make it the perfect pushchair for all lifestyles.

Its advanced features make the Crosswalk a nimble, easy to manoeuvre pushchair. Its exclusive large PU tyres, 10 times more resistant than traditional tyres, have great shock absorbing properties. A tubular aluminium chassis, independent suspension with shock absorbers on the rear wheels and a more spacious seat with reclining multi-position backrest (including a unique horizontal new-born

position), offers baby greater comfort. Crosswalk has everything you could want in a pushchair.

Available to coordinate with the Crosswalk pushchair is the KOOS – one of the lightest and most innovative infant car seats on the market; the MATRIX LIGHT 2 – the safest, healthiest all-in-one carrycot and car seat in the world, and the new NANO foldable carrycot – the practical and light option for transporting baby whilst he rests. The soft NANO carrycot uses an exclusive system that means it can be folded up very easily and quickly to an extraordinarily small size, marking a new concept of soft carrycots where design and functionality are perfectly combined.

## CROSSWALK TECHNICAL

## TECHNICAL CHARACTERISTICS

- A** Pro-Fix system locks and unlocks car seats and carrycots with just one movement, eliminating the need for awkward fitting kits.

# TWONE WHERE THERE'S ROOM FOR ONE, THERE'S ROOM FOR TWO

## THE WORLD'S MOST EVOLUTIONARY PUSHCHAIR THAT GROWS WITH YOUR FAMILY

The Jané Twone's evolutionary and convertible design allows it to adapt to many different combinations; you can change it from a one-seater pushchair to a travel system or even a twin pushchair in just a few seconds! It offers great versatility when connecting infant car seats, carrycots and seats units that are all fitted easily thanks to the Pro-Fix system.

The Jané Twone is extremely compact and multifunctional, specially designed to grow with your family whether you have one child, twins or children of different ages. Personalise it however you like and you'll discover many surprising combinations!

In single mode it features a large shopping basket so you can carry everything you need effortlessly, a reversible seat unit so you can have your baby facing you as you walk, and smaller lighter swivel front wheels

with independent suspension which are perfect for getting about on the city streets. Its compact book type folding system makes it easier to carry and store wherever you decide to take it.

The Jané Twone converts to a twin by simply adding the secondary lower seat unit (optional accessory) onto the rear wheels. This seat unit, like the front seat unit, has three different recline positions for your baby. And for different ages, or for newborn twins, you can decide on the different infant car seats and carrycots available.

Available to coordinate with the Twone pushchair is the KOOS – one of the lightest and most innovative infant car seat on the market and the MATRIX LIGHT 2 – the safest, healthiest all-in-one carrycot and car seat in the world.

## TWONE TECHNICAL

## TECHNICAL CHARACTERISTICS

- A** Pro-Fix system (patented) locks and unlocks car seats and carrycots with just one movement, eliminating the need for awkward fitting kits.
- B** Can convert into a twin pushchair yet still maintaining the footprint of a single pushchair.
- C** Lower Pro-Fix mountings for the installation of the lower seat unit or infant car seat / carrycot.
- D** Height adjustable soft touch ergonomic handlebar with 7 positions (79-108 cm).
- E** Handle brake.
- F** Detachable rear wheels with protective mudguards.
- G** Unique swing gate bar making it easier to install the additional lower seat unit or child.
- H** Smooth and efficient front lockable swivel wheels.
- I** Independent front suspension.
- J** Removable and washable seat upholstery.
- K** Large capacity shopping basket.
- L** Main seat unit is removable, reversible and has 3 recline positions with adjustable footrest.
- M** PU tyres which are 10 times more hard-wearing than traditional tyres and with great shock absorbing properties.
- N** Lightweight, compact folding aluminium chassis.
- O** Foot apron zips away into the bumper bar.

# RIDER COMFORT FOR YOUR BABY AND ALSO FOR YOU

## RIDER GOES STRAIGHT INTO POLE POSITION

You want the very best for your baby, no matter what. The Rider offers quality and total comfort right down to the smallest detail. Your precious new arrival will spend a lot of time in their travel system. That's why we have combined our exclusive Rider and Trider award winning pushchairs with Matrix Light 2, Transporter 2 and Strata infant car seats and auto carrycots, to ensure every moment is comfortable, safe, and as healthy as possible for baby.

An ingenious and innovative patented folding system ensures that when the Jané Rider folds, the unique retractable rear wheels reduce the folded size by an extra 30%. This makes it one of the most compact on the market. The magnificent rear suspension with adjustable shock absorber makes the ride very comfortable for the baby.

The Jané Rider has a streamlined chassis with a unique inverted 'C' shaped structure making it easier to push

and, because there's no obstructive rear axle for feet to kick against, your posture isn't compromised. This makes taking baby for a walk a breeze.

The higher seating position means the Rider can also be used as a highchair as it adapts perfectly to table level. The seat unit is also reversible meaning it can be fitted onto the chassis in two different directions, with baby facing you or facing ahead.

Available to coordinate with the Rider pushchair are the STRATA – safest infant car seat in its category; the MATRIX LIGHT 2 – the safest, healthiest all-in-one carrycot and car seat in the world, and the TRANSPORTER 2 – the award winning carrycot (that's also a lie-flat car seat) and the safest carrycot in the world! These are all brilliant, innovative and award winning products combined to deliver the very best for your baby.

## RIDER TECHNICAL

## TECHNICAL CHARACTERISTICS

- A** Pro-Fix system locks and unlocks car seats and carrycots with just one movement.
- B** Patented folding system reduces the size by up to 30%.
- C** Easy unfolding system that only needs one hand.
- D** Reversible and detachable seat unit.
- E** Inverted "C" shaped rear structure leaves more room for your feet, making it easier to push.
- F** Lightweight anodized aluminium tubular chassis.
- G** 3 Position reclining backrest and footrest.
- H** Handlebar brake lever.
- I** Wheels have steel ball bearings to maximize manoeuvrability and now with NEW highly resistant and shock absorbing PU tyres.
- J** Adjustable suspension with central shock absorber optimises your baby's comfort.
- K** Higher seat unit keeps baby above the pollution, car fumes and allows it to be used as a highchair when out and about.
- L** Quick release removable rear wheels.
- M** Handlebar cover to prevent wear and tear through continual use of the pushchair.
- N** Height adjustable handlebar (85- 110 cm).

# TRIDER ALL-TERRAIN STROLLS

## THE ALL-TERRAIN WITH SHOCK ABSORBER TAKES ROUGH WITH SMOOTH

The Jané Trider lets you enjoy your trips out with complete freedom. It offers you a chassis with minimalist style complete with all the benefits of an extreme design.

The three large high performance puncture-proof rubber wheels are perfect for adapting to any terrain and surface, and the front wheel swivels to give maximum freedom of movement. The brilliant long length suspension stroke with adjustable shock absorber, offers the baby maximum comfort.

It has a handle bar brake lever, so there's no foot-operated brake pedal to threaten the toenails of sandal wearers and its seat unit is reversible, so baby can enjoy his trip out facing the street or travelling backwards, facing his parents. The higher seat unit

means it can also be used as a high chair, as it adapts perfectly to the table top. This carefully studied position of the seat is also ideal for your child's health as it keeps him away from pollution, car fumes and insects in long grass when off road.

Its extremely compact folded size, and the lightness of the aluminium, make it easy to take anywhere. Like the rest of the Jané range, the Jané Trider is fitted with the Pro-Fix system (patented) which means its carrycots and car seats can be connected quickly and safely with just one movement - unlike most prams on the market which require awkward fixing kits. With Jané everything is integrated into the system, so with the simple press of a button your travel system can be transformed.

## TRIDER TECHNICAL

## TECHNICAL CHARACTERISTICS

- A** Puncture proof all-terrain wheels with PU tyres.
- B** Adjustable suspension with central shock absorber optimises your baby's comfort.
- C** Extremely compact folding, with or without seat attached.
- D** Quick release removable wheels.
- E** Higher seat unit keeps baby above the pollution, car fumes and allows it to be used as a highchair when out and about.
- F** Reversible and detachable seat unit.
- G** 3 Position reclining backrest and footrest.
- H** Extendable hood and hood visor.
- I** Inverted "C" shaped rear structure leaves more room for your feet, making it easier to push.
- J** Lightweight anodized aluminium tubular chassis.
- K** Height adjustable handlebar (83- 108 cm).
- L** Pro-Fix system locks and unlocks car seats and carrycots with just one movement.
- M** Patented folding system reduces the size by up to 30%.
- N** Easy unfolding system that only needs one hand
- O** One touch parking brake on the handlebar.
- P** Lockable front swivel wheel.

## GOING BEYOND SAFETY REGULATIONS

### FOR MAXIMUM SPACE AND COMFORT - THE WORLD'S SAFEST CARRYCOT

Transporter 2 is the carrycot from Jané that is the most comfortable and safest in its category. Continuous research and development means that structurally and technically it's a market leader in its class.

The Jané Transporter 2 is not just a carrycot, but also a Group 0 lie-flat restraint system which is especially recommended by health officials for longer journeys. Newborn babies should ideally lie completely flat as this position facilitates newborn respiration, nurtures the abdomen and aids optimal spinal development. The Transporter 2 recognises this important requirement and gives your child the best start in life.

Its honeycomb structure gives maximum rigidity and resistance with minimum weight while the full

polystyrene inner lining provides maximum absorption qualities.

The new seat belt fasteners, which are easier to use, prevent the carrycot from rotating and it also has the 'misuse' system which prevents the carrycot being installed incorrectly in the car with the seat backrest raised.

With regards to comfort, its adjustable ventilation system, with membrane fabric, offers better breathability by regulating the air flow, creating a pleasant temperature for your baby. Its backrest can be reclined in various positions from a button on the outside, ensuring that your baby is always as comfortable as possible.

## TRANSPORTER 2 TECHNICAL

## TECHNICAL CHARACTERISTICS

- A** Can be used as a lie-flat car seat. Unlike conventional infant car seats this lie-flat auto carrycot doesn't have any time restrictions, meaning a newborn can travel in it for longer journeys nonstop.
- B** Can be used as a carrycot for overnight sleeping.
- C** Seat belt fasteners prevent the carrycot from rotating and its misuse system prevents incorrect installation.
- D** Integral shock absorbing material offers 360° protection.
- E** 3-Point safety harness keeps baby safely in place.
- F** Easy one-pull harness adjustment.
- G** Its Reinforced honeycomb structure reduces weight for carrying and maximises structural integrity.
- H** Adjustable backrest is reclined from an outside lever so not disturbing baby when they fall asleep.
- I** Breathable materials and the ventilation system maintains a comfortable temperature for baby.
- J** Pro-Fix system, compatible with all Jané pushchairs.
- K** Soft, padded covers, easy to remove and wash.
- L** Smartphone QR barcode for in car fitting video.

## FIRST EVOLUTIONARY GROUP 0/0+ IN THE WORLD

### CONVERTIBLE CAR SEAT AND CARRYCOT

The new multi-award winning Group 0/0+ Matrix Light 2 from Jané is a revolutionary multi-functional infant car seat that turns into a carrycot. The evolution of the award-winning classic Matrix, it is the only infant car seat on the market (patented) that offers the option of safely travelling with your baby in the sitting up or lying down position in the car, especially recommended by health officials for long journeys.

This means that if your baby is sleeping in the Jané Matrix Light in the house he can be safely moved to the car, taken to the shops, and brought back home again without ever having to be moved or disturbed from sleep. It also delivers great value for money as it can be used 24/7 - for overnight sleeping when used

with a mattress, just like a conventional carrycot, and for naps during the day, yet converts effortlessly into a car seat when required - giving you the best of both worlds at a fraction of the price.

### HEALTH BENEFITS

Health officials and medical studies agree that to minimise periods of oxygen desaturation, newborn babies should be transported in a lie-flat system which is the healthiest way for them to travel especially on longer journeys. This position facilitates newborn respiration, nurtures the abdomen and aids optimal spinal development. The Jané Matrix Light recognises this important requirement and gives your baby the best start in life.

# MATRIX LIGHT 2

# TECHNICAL CHARACTERISTICS

- A** G0-G0+ convertible system. Baby can initially travel lying flat helping his lungs to develop correctly and prevent any respiratory problems.
- B** 4 recline positions to adapt to your infant's comfort.
- C** 2 positions approved for vehicles: (1) Flat position 180°, ideal rest for baby in the first months of life. (2) Sitting position 138°. ECE R44/04.
- D** G0+ Retention clip, locks the seat belt to increase stability and reduce movement during an impact.
- E** Installation with either Seat Belt or Isofix.
- F** 5-Point safety harness allows for a larger fastening surface.
- G** More spacious interior and a lighter structure.
- H** Automatic belt height adjustment system.
- I** One-pull harness adjustment.
- J** Integral protection: Shock absorbing material throughout, Polystyrene.
- K** Pro-Fix system, compatible with Jané pushchairs.
- L** Ventilation system.
- M** Complete with hood & apron.
- N** Carrying handle. 3 positions.

# STRATA THE SAFEST CAR SEAT IN ITS CATEGORY

★★★★★  
**STRATA**  
EUROTEST 2008

Maximum safety score in independent crash tests.

Strata  
Instruction Video

## THE SAFEST CAR SEAT IN ITS CATEGORY - EUROTEST 2008

Strata by Jané has obtained the maximum score in Group 0+ car seats installed with the adult 3-point seat belt in the European test performed by child safety experts and consumer organizations (EuroTest 2008, Which? Magazine in UK - Best Buy). So it is not just the safest car seat, but also the only one that helps pulmonary development.

This more spacious infant car seat not only allows baby to travel more comfortably but also to travel in the safer rearward facing position for longer, up to 13kg, 18 months approx.

The baby's headrest has double protection; thanks to its automatically adjusting headrest and the Strata's shell (made of recyclable, high resistance polypropylene). The entire surface that comes into contact with the

baby is protected with shock absorbing material.

The incorporated 5-point harness allows for a larger fastening surface, and therefore provides a higher level of safety when compared to the traditional 3-point harness that's found on most infant car seat.

The Strata Platform is an accessory which has been specially designed to make it even easier to install the Strata in your car. It uses the Isofix system in your car and Jané's patented Pro-fix system on the Strata to make it the safest, easiest and quickest way to install the car seat in the car or travel system. A unique and handy smart phone QR barcode also delivers an in car video demonstration to avoid user errors. Jané was the first car seat manufacturer to use this innovative technology.

## STRATA TECHNICAL

## TECHNICAL CHARACTERISTICS

- A** More spacious model: allows baby to travel in the safer rearward facing position for longer.
- B** Award winner. Officially the safest car seat in its category.
- C** Low-routing, leaves the area for baby's feet free.
- D** Install with seat belts or optional Isofix Platform.
- E** 5-Point safety harness allows for a larger fastening surface, and therefore provides a higher level of safety when compared to the conventional 3-Point harness that's found on most infant car seats.
- F** Automatic height adjustment of the shoulder straps by simply pressing a button avoids user error and the inconvenience of removing and refitting the harness as baby grows.
- G** Height adjustable headrest offers double protection.
- H** One-pull harness adjustment.
- I** Seat belt lock, for increased stability.
- J** Pro-Fix: locks and unlocks car seat with just one movement. Compatible withal Jané pushchairs.
- K** Removable hood for protection against the elements.
- L** Air circulation system for your babys comfort.
- M** Soft, padded covers, easy to remove and wash.
- N** Smartphone QR barcode for in car fitting videos.

# KOOS BETTER DESIGN, LIGHTER AND SAFER.

## BETTER DESIGN, LIGHTER AND SAFER

Koos is the new solution from Jané for group 0+. Koos is the infant car seat that combines an extremely light-weight shell with maximum safety. Made using breathable materials, Koos is very comfortable for the baby and easy to handle for parents.

The very stable, light structure makes the infant carrier very easy to carry and also makes it safer for the baby. In the event of an impact the displacement is less than it would be in a heavier infant car seat.

The new ergonomic handle lets you change the position quickly, safely and easily. Koos is ideal for travelling but also for going out walking, as it is fitted with the "Pro-Fix" system, meaning that with just one movement, it can be fitted onto your Jané chassis to make a travel system.

## KOOS PLATFORM

The fact that installing infant car seats in the car with the seat belt can seem complicated, has led us to develop the new Koos Platform.

The new optional Koos Platform allows for safe, convenient and quick installation as it is completed in just one simple movement. The platform is securely fastened to the vehicle using the Isofix system, which maximises the safety of the Koos infant car seat, since the Isofix system greatly reduces the risk of any installation errors.

The new platform has been designed so it can be left permanently installed in the car, thereby avoiding all the hassle of constantly fitting and removing it.

## EPIC & CROSSWALK KOOS

# RACING

MAXIMUM SAFETY,  
MAXIMUM SCORE

## TWO CAR SEATS IN ONE

The Jané Racing is a Group 0-1 car seat, birth to 4 years of age approx. It's simple to fit and with its side impact protection the Racing gives you peace of mind right from day one.

An ergonomically designed seat, it adapts to the changing needs of a growing child from birth to 4 years (18 kg). The interior has expanded polystyrene lining which is designed to absorb energy in the event of an accident. This seat is particularly noteworthy for its deep impact protection shell, especially around your child's head, and also the adjustable newborn cushion filler which provides the correct posture and maximum comfort for a newborn baby.

The safest way for a newborn to travel in a car seat is rearward facing. In the first stage - group 0, the

Racing car seat can be reversed and can be used from birth. In this rearward facing position, with the aid of a clever foot which descends from its base, it will angle the seat correctly for a newborn baby. Once the seat is fully reclined in this position, it will ensure your newborn is in the correct posture that is essential for his development and comfort.

After this first stage once your baby reaches 9 kg in weight (Approx. 9 months) you can then install the Racing car seat in the forward facing position - group 1. This means that the Racing car seat provides protection with no compromises in the Group 0 and 1, and can be used from birth right up until your child is about 4 years old.

## RACING TECHNICAL

## TECHNICAL CHARACTERISTICS

- A** Rearward and forward facing car seat.
- B** Installation with 3-point seat belt.
- C** Anti-swaying system, Lowrider Group 0. Designed so the seat belts anchor as low as possible at the base, and as high as possible at the shoulder. This gives the maximum stability and protection in the event of a crash.
- D** Group 0 foot – the height of the base re-equilibrates the position of the car seat. When rearward facing the foot is lowered to increase the recline, comfort and safety of the newborn.
- E** New born support cushion included.
- F** Height adjustable 5-point safety harness with high-performance non-slip chest pads. Ensuring baby is held firmly in total comfort and increases safety.
- G** Complies with ECE R44/04.

# EXO LITE

A NEW CAR SAFETY SEAT IS BORN

## A NEW CAR SEAT IS BORN WITH CONVENIENT, EASIER AND SAFER FASTENING.

EXO LITE is the new group 1 car seat from Jané. Exo Lite is now lighter and maximises protection thanks to the inner absorbent material and the large sides that absorb more energy in the event of an impact.

It can be installed easily and safely in the car using Isofix fasteners, which provide the seat with greater stability in the event of knocks or side impacts. Your child is always protected while travelling as it also has a third anti-rotational point or Support Leg included. This support leg limits tilting and rotation in the event of an impact and is easy to install and is compatible with most vehicles.

The Jané Exo Lite is versatile too, as you also have the option to install it with your vehicle's 3-point seat belt, making it easy to transfer between cars and also making it compatible with older cars that don't have Isofix.

With the additional protection of a separate and adjustable headrest, (which also correctly adjusts the harness to your child's build or to accommodate thicker clothing from time-to-time) your child will find it the perfect fit, and every parent will find it easy to adjust.

## EXO LITE TECHNICAL

## TECHNICAL CHARACTERISTICS

- A** Headrest and harness are synchronized and adjust by moving the headrest, avoiding the inconvenience of refitting the harness as your child grows.
- B** Multiple reclining seat positions.
- C** Height-adjustable 5-point safety harness with one-pull adjustment.
- D** Non-slip high performance chest pads increase your child's comfort and safety.
- E** Installation by either using the adult 3-Point Seat Belt or installation by Isofix.
- F** The included support leg limits tilting and rotation in the event of an impact.
- G** Indicators confirm the Isofix hooks are engaged.
- H** For easy storage the Isofix arms retract by turning the conveniently placed adjuster at the front.
- I** Impact absorbing material throughout the interior of the car seat provides maximum shock absorption and protection for your child.
- J** Cover easily removable and washable.
- K** Impact approved. Side Impact tested.
- L** Certified according to the European Safety Regulations ECE R44/04, number E9-041077.
- M** Smartphone QR barcode for in car fitting videos.

# EXO 3RD GENERATION ISOFIX

★★★★★  
EXO  
EUROTEST 2010

## THE SAFETY SEAT WITH 3RD GENERATION ISOFIX

The 3rd Generation of child car seats is here. The EXO by Jané is the first seat that incorporates an advanced pneumatic shock absorber system and the only one with 4 new worldwide patents in safety.

Most safety seats now use the ISOFIX system, allowing the seat to simply fasten to the chassis of the vehicle. ISOFIX devices are much easier to install and minimise the car seat's movement in the event of an impact, reducing the risk of serious injury by up to 22%.

### PATENTED SHOCK ABSORBING SYSTEM

Jané's EXO, 3rd Generation ISOFIX, goes a stage further introducing an exclusive Pneumatic Absorption System (PAS) with pneumatic piston that reduces the force of an impact by up to 4 G when compared to conventional ISOFIX car seats.

In the event of an accident, car seats experience G-force. Reducing this in turn reduces the potential G-force to your child, minimising potential injury. The patented shock absorption system does just this, by absorbing a high percentage of the impact to cushion and smooth out the blow. In other words, the G-force is lowered and it is less likely that the child will be injured in an accident.

### ELECTRONIC DEVICE TO GUARANTEE CORRECT INSTALLATION

An advanced electronic device detects whether ISOFIX anchorages are properly connected, with both lights and acoustic signals on its front panel. This system tells you if it's correctly installed any time, just by pressing the "TEST" key. If the lights are green, it indicates that it's correctly fitted.

## EXO TECHNICAL

## TECHNICAL CHARACTERISTICS

- A** Patented Electronic installation warning system.
- B** Patented Pneumatic Piston absorbs the energy of an impact and reduces deceleration by up to 4G, minimising the potential injury on your child.
- C** New system for tensioning the harness which reduces the movement of the child in the event of an accident (patented). Harness is tightened by the abdominal straps, while most car seats use the shoulder straps to do this.
- D** Synchronized headrest, harness and crotch strap with an easy single-handed adjustment (Patented).
- E** Multiple recline seat positions.
- F** 5-Point safety harness with one-pull adjustment.
- G** Non-slip high performance chest pads.
- H** 3 installation options (a) 3-Point Seat Belt, (b) Isofix and top tether or (c) Isofix and optional support leg (ideal if top tether can't be used).
- I** Top tether provides a third anchorage point, limiting the rotational movement of the seat.
- J** Impact absorbing material throughout the interior.
- K** Cover easily removable and washable.
- L** Smartphone QR barcode for in car fitting videos.
- M** Certified to European Safety Regulations ECE R44/04.

# QUARTZ ADAPTED TO THE CHILD AT EVERY STAGE

NEW  
DUE SPRING  
2015

## MAXIMUM SAFETY WITH AN UNIQUE AND EXCLUSIVE DESIGN

The new Quartz car safety seat is the latest addition to the complete CRS range from Jané. Quartz is a restraint system that uses Isofix fasteners, designed for group 2/3 from 15 to 36 kilograms, approximately 3 to 12 years.

Technologically advanced, Quartz is fitted with Proportional Height Adjustment, an integral adjustment system that lets you regulate the height by up to 11 positions. When the height of the seat is extended it is not just the headrest that moves; the backrest also moves to the corresponding height thereby guaranteeing that the child has maximum protection throughout all the stages of growth.

The child can rest comfortably as the Quartz has 3 reclining positions and is fitted with ventilation vents that work together with its breathable Soft Touch padding for the ultimate in comfort and to provide wellbeing during long journeys.

Comfort and quality reign supreme with form-hugging, supple, breathable, Soft-Touch-padding complemented with its stylish and innovative ergonomic design.

## QUARTZ TECHNICAL

## TECHNICAL CHARACTERISTICS

- A** Adaptable: Quartz is a multi-group safety seat designed to adapt to the child at each stage of growth, thanks to the integral height adjustment system (11 positions) that lets you extend the backrest and headrest.
- B** Maximum side protection, the wraparound shape of the frame increases the absorption of any possible impact and provides greater shock absorbing properties.
- C** 3 reclining positions so the baby can rest more comfortably.
- D** The headrest includes large sized ear protectors, which means that in the event of a side impact, the child's head remains in the safe area of the seat, thereby guaranteeing maximum protection.
- E** Ventilation: Ergonomic design with ventilation vents making it more breathable for the baby.
- F** Breathable Soft Touch padding, the covers can be taken off for washing.
- G** Anchored to the car via the standard Isofix system and the child is secured in the seat with the 3-point seat belt, obtaining greater stability. It can also be installed with just a 3-point seat belt.

# MONTECARLO R1 THE VALUE OF SAFETY

★★★★★  
MONTECARLO R1  
EUROTEST 2012

Montecarlo R1  
Instruction Video

Montecarlo R1 & Xtend  
Instruction Video

## ONE OF THE BEST AND SAFEST CAR SEATS ON THE MARKET

The Montecarlo R1 from Jané is specially designed to adapt to each stage of your child's growth. Suitable for children between 15 – 36 kg, this Group 2 – 3 car seat has an integral adjustment system that allows both the seat's height and width to be altered for a perfect fit, effectively protecting your child during all stages of growth and accommodating for different thickness of clothing depending on the days weather.

You can extend its usage even further when used with Jané's optional Xtend impact shield, a protective cushion that provides a safe and comfortable alternative to a harness. With the Xtend it can also be used as a Group 1 car seat, effectively extending the seats range from Group 1-2-3, 9 to 36 kg, 9 months to 12 years approx.

This car seat's unique aluminium structure improves protection by 70% when compared to a traditional system and is also equipped with an ISOFIX anchoring

system for the base of the seat, which combined with 3-point seat belt, obtaining greater stability.

Offering greater cushioning, the larger wrap around headrest increases shock absorption that's caused by an impact. The reclinable backrest and tilting sides provide optimum support for a restful journey and the aeration vents with the internal fabrics are breathable to maximise your child's comfort.

Montecarlo R1, as with all our car seats, is independently tested and approved under new European Car Safety Regulations ECE R44/04. This excellent seat was also subjected to the strict EUROTEST exam, which tests the safety and resistance of all the child safety seats on the market. It received one of the best scores on the market in its category, and an "excellent mark" with special mention made of its "safety in side crashes" and the "stability of the seat".

## MONTECARLO R1 TECHNICAL

## TECHNICAL CHARACTERISTICS

- A** Adaptable: a Multi-Group Safety Seat that easily adapts to your growing child thanks to its integral adjustment system.
- B** Optional Xtend impact shield allows this Group 2-3 car seat to cater for Group 1. Meaning the car seat can effectively be used from 9 to 36 kg, 9 months to 12 years approx.
- C** Anchored to the car via the standard Isofix system and the child is secured in the seat with the 3-point seat belt, obtaining greater stability. It can also be installed with just a 3-point seat belt.
- D** The aluminium structure improves protection by 70% compared to traditional systems.
- E** Height and width of the sides of the headrest and the backrest areas are independently adjustable.
- F** Reclining backrest and adjustable armrests.
- G** Maximum protection thanks to the improved large wrap around headrest and side shock absorption.
- H** Seat belt route means the cars diagonal belt adapts perfectly to the height of the child's shoulder.
- I** Ergonomic design and ventilation maximises comfort.
- J** Smartphone QR barcode for in car fitting videos.
- K** Indicators confirm the ISOFIX hooks are engaged.
