

JANÉ®

COLLECTION 2016-17
UK & IRELAND EDITION

JANÉ, you and UNICEF against malaria. 

JANÉ®

Designed in Barcelona, since 1932.

WELCOME TO THE NEW 2016-17 COLLECTION

Through the decades JANÉ has established a reputation for producing prams and car seats that are innovative and simply unmatched in terms of their versatility, strength and comfort. JANÉ continues to pioneer ground-breaking developments in child health and safety that place the brand as a market leader, trusted by millions of parents across the globe.

We are delighted to present to you the JANÉ 2016-17 UK collection, highlighting our fantastic award winning collection of prams, travel systems and car seats for your new family.

New this year is the JANÉ Crosswalk Convert. Blessed with the same magical DNA as the Epic and Crosswalk, it's the new high performance all-terrain model with a unique convertible lie-flat seat and carrycot that's suitable for new-borns. It has a super-compact folding system and is ultra-smooth and light. Sophisticated in the city and solid in the country, these characteristics make it perfect for all lifestyles.

The range also includes the new Grand, the new Group 1-2-3 car seat that can adapt to your child at every stage from 9 months to 12 years under standard ECE R44/04 and has been designed and created to comply with the future I-SIZE standard; our Transporter 2, the healthiest, safest carrycot in the world and the award-winning revolutionary multi-functional Matrix Light 2, which is still the healthiest and safest infant car seat in the world.

With our extensive range of award-winning exciting products, I am sure you will find the ideal solution for all your baby's needs.

TECHNOLOGY AND RESEARCH AVAILABLE FOR EVERYONE

Jané carries out a lot of social work to help to improve mobility conditions for children.

- We allocate a large amount of our resources to research to provide products that are safer every day.
- We created the JANÉ EDUCA programme to make children aware of the importance of using their safety seats correctly.
- We collaborate with automobile associations to produce and promote multiple studies about child safety.
- We collaborate with UNICEF

in support of
unicef 

Together against Malaria

TOGETHER AGAINST MALARIA

After a 6-year alliance with UNICEF, concentrating on supplying mosquito nets coated with insecticide to combat malaria, we have managed to take great steps forward in the fight against this disease. In the Democratic Republic of Congo (DRC), malaria is the biggest cause of death for children under five and the reason behind more than 59% of hospital visits. Malaria is also particularly dangerous for pregnant women, and is the cause of half of all hospital admissions. The fight against malaria is a big challenge, and in the Democratic Republic of Congo 97% of the population live in areas of risk. Jané joined UNICEF and the fight against malaria in 2010, and over this 6-year alliance it has contributed to the work of the organisation and has helped to purchase and distribute mosquito nets treated with insecticide. Each Jané pushchair comes with the exclusive solidarity wristbands Jané in support of UNICEF, in acknowledgement of all its customers and as a symbol of this collaboration, because you form part of this initiative too. Thanks to the collaboration of this team made up of JANÉ, UNICEF and you, we have made great progress, but we can't stop here. We will continue working to improve the future of our children. Thank you once again for your trust and solidarity.

KOOS

history

THE FIRST JANÉ PUSHCHAIR WAS CREATED IN 1932

The son of Ramón Jané Caúm, Manel Jané Vidal, changed the direction of the business when his son was born. "If you're such a good locksmith, if you've got so many ideas for other people, prove you've got them for your son as well". Encouraged by his father, Manel Jané accepted the challenge and, a few days later, little Ramón went out on wheels, in a buggy that Manel Jané was very proud of.

The admiration it caused among neighbours and friends inspired him to make a couple of folding pushchairs and present them in department stores in Barcelona. A week later he got his first orders. Jané began to make folding pushchairs for children. That's how our story began, with a commitment to excellence, as if we were creating products for our own babies.

1932

84 years committed to your baby.

1939

Jané created and patented the most compact folding chassis on the market.

1967

The first folding stroller from Jané with a vinyl bassinet.

1978

The umbrella stroller, a new concept in reclining and folding strollers.

PROTECT

GRAND

QUARTZ

crash test

GOING BEYOND THE REGULATORY REQUIREMENTS

Jané moves forward with the confidence, coming from experience and the responsibility of leadership. The Jané Crash Test Research Center is the safety laboratory of Jané, and one of the most advanced in the world. Ready to perform tests at the same level as EuroNCAP, it lets us carry out all the tests necessary, not only to guarantee maximum safety, but also to create new pioneering and innovative designs.

This relentless quest to go one step further is backed up daily by the constant investment of Jané's resources in research, safety and the protection of babies.

PRODUCTS AHEAD OF THEIR TIME

Jané's premise is to create products of the future, now. The innovations offered by their design provide a response, not only to all the new mothers and fathers who want the design to suit their baby's delicate shape better and fit in with their lifestyle, but are also backed up by recent medical reports.

pro-fix

SYSTEM GENERATION

The new and ergonomic Pro-fix system means that all of the Jané carrycots and infant car seats can easily be fitted onto, or taken off, the Isofix platform or pram chassis. With just one movement, and two fastening points, you can fit any component onto the chassis without the need for awkward "fitting kits".

INSTALLATION: To fit the infant car seat or carrycot onto the chassis you just need to make one vertical movement and position it in the slots of the two fastening points without needing to do anything else to the chassis.

DETACHING: To detach it, pull the two buttons on the sides and with just one movement the infant car seat or carrycot will be released from the chassis or Isofix platform in the car.

HANDLE AND FOLD DOWN HOOD: Use the two buttons to choose between the 4 different positions.

muum

more comfortable walks

The Jané Muum is a new concept in pushchairs that combines the latest design trends with the most innovative safety and comfort features. It has a light-weight chassis and folds without having to remove the pushchair seat unit.

Adaptability is key to this excellent pushchair, which converts easily thanks to Jané's Patented Pro-Fix system which locks and unlocks the carrycot or car seats with just one movement. The Muum's seat unit adapts at all times to the most appropriate position for the baby's back, because of its independent 3 position backrest and footrest. It's versatile enough to suit newborns right through to toddlers. It's one of the most comfortable models on the market due to its well-designed roomy seat.

Keen to make life as easy as possible for busy parents, the Jané Muum features a large capacity shopping basket so you can carry everything you need effortlessly. It also has a reversible seat unit so you can have your baby facing you as you walk. Its smaller lighter swivel front wheels with independent suspension, are perfect for getting about on the city streets. And its large removable rear wheels make the pushchair fold up even more compactly, making it easier to carry and store wherever you decide to take it.

The Muum makes everything not only better for you but also easier and more accessible. The Muum from Jané, for more comfortable walks.

muum
TECHNICAL

TECHNICAL CHARACTERISTICS

- A** Pro-Fix system (patented) locks and unlocks car seats and carrycots with just one movement, eliminating the need for awkward fitting kits.
- B** Book type compact folding system.
- C** 3 Position full reclining lie-back seat unit with adjustable footrest (suitable from birth).
- D** Foot brake pedal.
- E** Large wraparound hood.
- F** Height adjustable soft touch PU ergonomic handlebar, 7 positions (78-108cm).
- G** Lockable front swivel wheels that's smoother and easier to control.
- H** Independent front suspension.
- I** Quick release rear wheels for more compactness when folded.
- J** Removable and washable seat upholstery.
- K** Large capacity shopping basket.
- L** Removable and reversible seat unit.
- M** Reinforced seat unit with a honeycomb structure means it's lightweight and strong.
- N** Lightweight aluminium chassis. Free stand folding.
- O** Chassis can fold with seat unit attached and has a carrying handle which makes it easier to carry.

MATRIX INFANT CAR SEAT SYSTEM - HEALTH BENEFITS

Health officials and medical studies agree that to minimise periods of oxygen desaturation, newborn babies should be transported in a lie-flat system which is the healthiest way for them to travel, especially on longer journeys. This position facilitates newborn respiration, nurtures the abdomen and aids optimal spinal development. The Jané Matrix Light recognises this important requirement and gives your baby the best start in life.

epic

a unique pushchair

Sporty, lightweight, compact and dynamic are the four adjectives that define the Epic from Jané. Its urban and pioneering design stands out because of its lightweight tubular chassis that gives it a hardwearing and innovative character.

Additionally, Epic offers extraordinary versatility: hardwearing PU tyres with shock-absorbing properties; independent, long

travel suspension on the rear wheels; excellent manoeuvrability, precise turning; a double hand brake lock and a more compact patented folding chassis with the detachable and reversible seat.

epic

TECHNICAL

TECHNICAL CHARACTERISTICS

- A** Pro-Fix system (patented) locks and unlocks car seats and carrycots with just one movement, eliminating the need for awkward fitting kits.
- B** Extremely compact folding system (Patented).
- C** Tubular aluminium chassis.
- D** Reversible and detachable seat unit.
- E** 3 Position reclining seat and footrest.
- F** Compact folding, even with the seat unit in place.
- G** Larger detachable rear wheels.
- H** PU tyres; 10 times harder wearing than traditional tyres and with great shock absorbing properties.
- I** PU leatherette handlebar cover.
- J** Long travel Independent suspension with 2 shock absorbers on the rear wheels.
- K** Smooth and efficient front lockable swivel wheels thanks to the balanced front wheel set.
- L** Inverted "C" shaped rear structure makes room for your feet and easier to push.
- M** Double brake lock on the handle.
- N** Height adjustable handle (80- 100 cm).

crosswalk

chic in the city, strong in the country

Equipped with the same DNA as the Epic, the Crosswalk is born! It's the new high performance all-terrain pushchair with a patented compact folding system. Chic in the city and strong in the country, these characteristics make it the perfect pushchair for all lifestyles.

Its advanced features make the Crosswalk a nimble, easy to manoeuvre pushchair. Its exclusive large PU tyres, 10 times more resistant than traditional tyres, have great shock absorbing properties. A tubular aluminium chassis, independent suspension with shock absorbers on the rear wheels and a more spacious seat with reclining multi-position backrest (including a unique horizontal new-born position), offers baby greater comfort. Crosswalk has everything you could want in a pushchair.

twone

where there's room for one,
there's room for two

The Jané Twone's evolutionary and convertible design allows it to adapt to many different combinations; you can change it from a one-seater pushchair to a travel system or even a twin pushchair in just a few seconds! It offers great versatility when connecting infant car seats, carrycots and seats units that are all fitted easily thanks to the Pro-Fix system.

The Jané Twone is specially designed to grow with your family whether you have one child, twins or children of

different ages. Personalise it however you like and you'll discover many surprising combinations!

The Jané Twone converts to a twin by simply adding the secondary lower seat unit onto the rear wheels. This seat unit, like the front seat unit, has three different recline positions for your baby. And for different ages, or for newborn twins, you can decide from either the lightweight KOOS or the MATRIX LIGHT 2 infant car seat/carrycot.

28 pushchairs

twone
TECHNICAL

TECHNICAL CHARACTERISTICS

- A** Pro-Fix system (patented) locks and unlocks car seats and carrycots with just one movement, eliminating the need for awkward fitting kits.
- B** Can convert into a twin pushchair yet still maintaining the footprint of a single pushchair.
- C** Lower Pro-Fix mountings for the installation of the lower seat unit, infant car seat or carrycot.
- D** Height adjustable PU ergonomic handlebar with 7 positions (79-108 cm).
- E** Handle brake.
- F** Detachable rear wheels with protective mudguards.
- G** Unique swing gate bar making it easier to install the additional lower seat unit or child.
- H** Smooth and efficient front lockable swivel wheels.
- I** Independent front suspension.
- J** Removable and washable seat upholstery.
- K** Large capacity shopping basket.
- L** Main seat unit is removable, reversible and has 3 recline positions with adjustable footrest.
- M** PU tyres which are 10 times more hard-wearing and with great shock absorbing properties.
- N** Lightweight, compact folding aluminium chassis.
- O** Foot apron zips away into the bumper bar.

rider

comfort for
your baby
and also
for you

At the top of the Jané range is the Rider and its 3 wheel all-terrain version, the Trider. Its anodised aluminium tubular chassis is fitted with an ingenious and innovative patented folding system ensuring that when the chassis folds, the unique retractable rear wheels reduce the folded size by an extra 30%. This makes it one of the most compact on the market.

The lightness of the aluminium along with the balanced geometry and the large diameter rear wheels, make it quick, comfortable and easy to push, while the magnificent rear suspension with adjustable shock absorber makes the ride very comfortable for your baby.

The streamlined chassis has a unique inverted 'C' shaped structure making it easier to push and, because there's

no obstructive rear axle for feet to kick against, your posture isn't compromised, offering you a light, easy stroll.

The higher seating position means the Rider can also be used as a highchair when out and about as it adapts perfectly to table level. Its seat unit is also reversible meaning it can be fitted onto the chassis in two different directions, with baby facing you or facing ahead.

rider

TECHNICAL

TECHNICAL CHARACTERISTICS

- A** Pro-Fix system locks and unlocks car seats and carrycots with just one movement.
- B** Patented folding system reduces the size by up to 30%.
- C** Easy unfolding system that only needs one hand.
- D** Reversible and detachable seat unit.
- E** Inverted "C" shaped rear structure leaves more room for your feet, making it easier to push.
- F** Lightweight anodized aluminium tubular chassis.
- G** 3 Position reclining backrest and footrest.
- H** Handlebar brake lever.
- I** Wheels have steel ball bearings to maximize manoeuvrability and now with NEW highly resistant and shock absorbing PU tyres.
- J** Adjustable suspension with central shock absorber optimises your baby's comfort.
- K** Higher seat unit keeps baby above the pollution, car fumes and allows it to be used as a highchair when out and about.
- L** Quick release removable rear wheels.
- M** Height adjustable handlebar (85- 110 cm).
- N** Lockable front swivel wheels.

trider

all-terrain strolls

The Jané Trider lets you enjoy your trips out with complete freedom. It offers you a chassis with minimalist style complete with all the benefits of an extreme design.

The three large high performance puncture-proof PU rubber wheels are perfect for adapting to any terrain and surface, and the front wheel swivels to give maximum freedom of movement. The brilliant long length suspension stroke, with adjustable shock absorber, offers the baby maximum comfort.

It has a handle bar brake lever, so there's no foot-operated brake pedal to threaten the toenails of sandal wearers and its seat unit is reversible, so baby can enjoy his trip out facing the street or travelling backwards, facing his parents.

The higher seat unit means it can also be used as a high chair, as it adapts perfectly to the table top. This carefully studied position of the seat is also ideal for your child's health as it keeps him away from pollution, car fumes and insects in long grass when off road.

Its extremely compact folded size, and the lightness of the aluminium, make it easy to take anywhere. Like the rest of the Jané range, the Jané Trider is fitted with the Pro-Fix system (patented) which means its carrycots and car seats can be connected quickly and safely with just one movement - unlike most prams on the market which require awkward fixing kits. With Jané everything is integrated into the system, so with the simple press of a button your travel system can be transformed.

trider

TECHNICAL

TECHNICAL CHARACTERISTICS

- A** Puncture proof all-terrain wheels with PU tyres.
- B** Adjustable suspension with central shock absorber optimises your baby's comfort.
- C** Extremely compact folding, with or without seat attached.
- D** Quick release removable wheels.
- E** Higher seating position allows it to be used as a highchair when out and about.
- F** Reversible and detachable roomy seat unit.
- G** 3 Position reclining backrest and footrest.
- H** Extendable hood with hood visor.
- I** Inverted "C" shaped rear structure leaves more room for your feet, making it easier to push.
- J** Lightweight anodized aluminium tubular chassis.
- K** Height adjustable handlebar (83- 108 cm).
- L** Pro-Fix system locks and unlocks car seats and carrycots with just one movement.
- M** Patented folding system reduces the size by up to 30%.
- N** Easy unfolding system that only needs one hand
- O** One touch parking brake on the handlebar.
- P** Lockable front swivel wheel.

FOR YOUR PRAM

nest plus pushchair footmuff

Anti-pilling fleece interior that's very soft and warm. Water resistant exterior protects your baby from the elements. The top apron cover can be zipped off to leave a pushchair liner, while the cover can be used as a pram quilt. Universal design with different fitting options to the seat (Velcro straps or elastic enveloping corners) allows it to fit all pushchairs on the market. Made from hard-wearing and stain resistant materials. Footmuff opens both sides. Top quality zip. Inside feet protector. The length can be shortened to adjustable as child grows. Approximate dimensions: 110 x 50 cm.

nest basic pushchair footmuff

Universal design with different fitting options to the seat (ties and/or Velcro straps). Fleece lining and an anorak type outer cover to protect from the weather. Water resistant exterior protects your baby from the elements. Made from hard-wearing and stain resistant materials. Quick fitting with a zip for baby's dirty feet to stick out of. Footmuff opens with central zip. Top quality zip. Unique and practical zipped pocket. Reflective material. Approximate dimensions: 110 x 50 cm.

kangaroo baby carrier 0-15 kg

This comfortable carrier spreads the weight between the hips and the back. This helps the baby's hips to develop correctly. Suitable from birth to 2 years (3.5 - 15kg). It features wider straps to distribute the weight evenly and an adjustable harness system that allows for easy opening, making it stress-free to load baby. The sitting area can be individually adjusted to allow for an optimal fit and a choice for Baby's legs to be held against the adult's hip or their legs hanging down. Its adjustable head support can be folded down so your child can be carried facing forward when they are a bit older and able to hold up their own head.

transporter 2

going beyond safety regulations

Transporter 2 is the carrycot from Jané that is the most comfortable and safest in its category. Continuous research and development means that structurally and technically it's a market leader in its class.

The Jané Transporter 2 is not just a carrycot, but also a Group 0 lie-flat restraint system which is especially recommended by health officials for longer journeys. Newborn babies should ideally lie completely flat as this position facilitates newborn respiration, nurtures the abdomen and aids optimal spinal development. The Transporter 2 recognises this important requirement and gives your child the best start in life.

TRANSPORTER 2
EUROTEST 2011

Winner of 2011 Eurotest, making it the safest carrycot in the world.

transporter 2

TECHNICAL

TECHNICAL CHARACTERISTICS

- A** Can be used as a lie-flat car seat. Unlike conventional infant car seats this lie-flat auto carrycot doesn't have any time restrictions, meaning a newborn can travel in it for longer journeys nonstop.
- B** Can be used as a carrycot for overnight sleeping.
- C** Seat belt fasteners prevent the carrycot from rotating and its misuse system prevents incorrect installation.
- D** Integral shock absorbing material offers 360° protection.
- E** 3-Point safety harness keeps baby safely in place.
- F** Easy one-pull harness adjustment.
- G** Its Reinforced honeycomb structure reduces weight for carrying and maximises structural integrity.
- H** Adjustable backrest is reclined from an outside lever so not disturbing baby when they fall asleep.
- I** Breathable materials and the ventilation system maintains a comfortable temperature for baby.
- J** Pro-Fix system, compatible with all Jané pushchairs.
- K** Soft, padded covers, easy to remove and wash.
- L** Smartphone QR barcode for in car fitting video.

strata

the safest car seat in its category - eurotest 2008

Strata by Jané has obtained the maximum score in Group 0+ car seats installed with the adult 3-point seat belt in the European test performed by child safety experts and consumer organizations (EuroTest 2008, Which? Magazine in UK - Best Buy). So it is not just the safest car seat, but also the only one that helps pulmonary development.

This more spacious infant car seat not only allows baby to travel more comfortably but also to travel in the safer rearward facing position for longer, up to 13kg, 18 months approx.

The baby's head has double protection; thanks to Strata's automatically synchronised headrest and the highly resistance polypropylene inner shell. Making the entire surface that comes into contact with your baby protected with shock absorbing material.

Strata's 5-point harness allows for an even larger fastening surface, and therefore provides a higher level of safety. The automatically synchronised headrest and harness also prevents user error when adjusting the seat to accommodate a growing baby.

STRATA
EUROTEST 2008

strata
TECHNICAL

TECHNICAL CHARACTERISTICS

- A** More spacious model: allows baby to travel in the safer rearward facing position for longer.
- B** Award winner. Officially the safest seat in its category.
- C** Low-routing, leaves the area for baby's feet free.
- D** Install with seat belts or optional Isofix Platform.
- E** 5-Point harness allows for a larger fastening surface, and therefore provides a higher level of safety.
- F** Synchronised headrest and shoulder straps prevents user error and the inconvenience of removing and refitting the harness as your baby grows.
- G** Height adjustable headrest offers double protection.
- H** One-pull harness adjustment.
- I** Seat belt lock, for increased stability.
- J** Pro-Fix: locks and unlocks car seat with just one movement. Compatible with all Jané pushchairs.
- K** Removable hood for protection against the elements.
- L** Air circulation system for your baby's comfort.

koos

better design, lighter and safer

Koos is the new solution from Jané for group 0+. Koos is the infant car seat that combines an extremely light-weight shell with maximum safety. Made using breathable materials, Koos is very comfortable for the baby and easy to handle for parents.

The very stable, light structure makes the infant carrier very easy to carry and also makes it safer for the baby. In the event of an impact the displacement is less than it would be in a heavier infant car seat.

Koos is ideal for travelling but also for going out walking, as it is fitted with the "Pro-Fix" system, meaning that with just one movement, it can be fitted onto your Jané chassis to make a travel system.

koos
TECHNICAL

TECHNICAL CHARACTERISTICS

- A** Lightest car seat in its category, only 2.9 kg.
- B** Pro-fix: locks and unlocks the car seat from any Jané chassis with just one movement.
- C** Polypropylene injected body very resistant to impacts.
- D** Adjustable harness with 3 height positions.
- E** Ergonomic padded pillow that supports the neck and body of the smallest babies.
- F** Ventilation system for permanent air circulation.
- G** 3-Point safety harness with one-pull adjustment.
- H** Ergonomic carrying handle with 4 different positions.
- I** Seat belt lock, for greater stability.
- J** Storage compartment.
- K** Removable and washable upholstery.
- L** Correct installation test.

protect

maximum safety,
maximum score

Protect from Jané, is the new safety seat designed to protect the child in the car from birth up to approximately 4 years (18 Kg in weight). Based on the experience of the popular Racing model from Jané, this new model has passed the strictest safety tests of European Directive ECE R44/04 and can be installed using the car seat belts in two positions: forward or rear facing.

The great new development of this car safety seat is that you can install it with your baby in the rear facing position up to 18 Kg, meaning your baby can travel more safely in the position you choose: in the rear facing position or facing forwards.

The new Protect from Jané, is certified as universal, therefore it can be installed in most cars (except those that are not fitted with universal seats).

grand

the seat that grows with them

new

Grand from Jané is here; the new evolutionary safety seat designed to protect babies from 9 to 36 kilos, approximately 9 months to 12 years.

Grand is a multi-group seat 1-2-3 designed to adapt and grow with the child at each stage. It is quick and easy to safely install using the Isofix anchors, and can be fitted on the front or the back seat of the vehicle.

The child will always be protected as it is also fitted with the Top Tether (anti-rotation strap). Grand has been approved as a child restraint system for the car, under

standard ECE 44/04 and has been designed and created to comply with the new future I-SIZE standard.

GROUP 1 children weighing between 9 and 18 kg - Install the seat with the Isofix anchors and anti-rotation strap (Top Tether). The child is held secure with the integrated 5-point seat belt.

GROUP 2 – 3 children weighing between 15 and 36 kg - Directly with the vehicle seat belt and optionally the seat can be secured with the Isofix anchors. The child is held secure with the vehicle 3-point seat belt.

grand
TECHNICAL

TECHNICAL CHARACTERISTICS

- A** Group 2-3 belt guide.
- B** Reclining button, 3 positions.
- C** Top Tether and Isofix.
- D** Integrated 5-point harness. One pull adjustment.
- E** Ventilation in the shell.
- F** Impact absorbing material.
- G** Removable and washable upholstery.
- H** **Group 1** - Adjustable headrest and harness height, to protect the child better in the event of a side impact as it supports the head better.
- I** **Switching from Group 1 to Group 2-3:** Changing the "anti-misuse" straps. Switching to a booster seat with backrest without having to detach the integrated straps, simply conceal them, this prevents any installation errors that could affect safety.
- J** **Group 1** children weighing between 9 and 18 kg- Install the seat with the Isofix anchors Top Tether. The child is held secure with the integrated 5-point seat belt.
- K** **Group 2-3** children weighing between 15 and 36 kg- Directly with the vehicle seat belt and optionally the seat can be secured with the Isofix anchors. The child is held secure with the vehicle 3-Point seat belt.

quartz

adapted to the child at every stage

The new Quartz car safety seat is the latest addition to the complete CRS range from Jané. Quartz is a restraint system that uses Isofix fasteners, designed for group 2/3 from 15 to 36 kilograms, approximately 3 to 12 years.

Technologically advanced, Quartz is fitted with Proportional Height Adjustment, an integral adjustment system that lets you regulate the height by up to 11 positions. When the height of the seat is extended it is not just the headrest that moves; the backrest also moves to the corresponding height thereby guaranteeing that the child has maximum protection throughout all the stages of growth.

The child can rest comfortably as the Quartz has 3 reclining positions and is fitted with ventilation vents that work together with its breathable Soft Touch padding for the ultimate in comfort and to provide wellbeing during long journeys.

Comfort and quality reign supreme with form-hugging, supple, breathable, soft-touch-padding complemented with stylish and innovative ergonomic design.

quartz
TECHNICAL

TECHNICAL CHARACTERISTICS

- A** Adaptable: Quartz is a multi-group safety seat designed to adapt to the child at each stage of growth, thanks to its unique integral proportional height adjustment system (11 positions) that lets you extend the backrest and headrest automatically.
- B** Maximum side protection, the wraparound shape of the frame increases the absorption of any possible impact and provides greater shock absorbing properties.
- C** 3 reclining positions so the baby can rest comfortably.
- D** The headrest includes large sized ear protectors, which means that in the event of a side impact, the child's head remains in the safe area of the seat, thereby guaranteeing maximum protection.
- E** Ventilation: Ergonomic design with ventilation vents making it more breathable for the baby.
- F** Breathable Soft Touch padding, the covers can be taken off for washing.
- G** Isofix fastening system, giving the seat extra safety and stability. It can also be installed with just a 3-point seat belt.
- H** Belt guide.

montecarlo R1

the value of safety

The Montecarlo R1 from Jané is specially designed to adapt to each stage of your child's growth. Suitable for children between 15 – 36 kg, this Group 2 – 3 car seat has an integral adjustment system that allows both the seat's height and width to be altered for a perfect fit, effectively protecting your child during all stages of growth and accommodating for different thickness of clothing depending on the days weather.

You can extend its usage even further when used with Jané's optional Xtend impact shield, a protective cushion that provides a safe and comfortable alternative to a harness. With the Xtend it can also be used as a Group 1 car seat, effectively extending the seats range from Group 1-2-3, 9 to 36 kg, 9 months to 12 years approx.

This car seat's unique aluminium structure improves protection by 70% when compared to a traditional system and is also equipped with an ISOFIX anchoring system for the base of the seat, which combined with 3-point seat belt, obtaining greater stability.

Offering greater cushioning, the larger wrap around headrest increases shock absorption that's caused by an impact. The reclinable backrest and tilting sides provide optimum support for a restful journey and the aeration vents with the internal fabrics are breathable to maximise your child's comfort.

Montecarlo R1, as with all our car seats, is independently tested and approved under new European Car Safety Regulations ECE R44/04. This excellent seat was also subjected to the strict EUROTEST exam, which tests the safety and resistance of all the child safety seats on the market. It received one of the best scores on the market in its category, and an "excellent mark" with special mention made of its "safety in side crashes" and the "stability of the seat".

TECHNICAL

TECHNICAL CHARACTERISTICS

- A** Adaptable: a Multi-Group Safety Seat that easily adapts to your growing child thanks to its integral adjustment system.
- B** Optional Xtend impact shield allows this Group 2-3 car seat to cater for Group 1. Meaning the car seat can effectively be used from 9 to 36 kg, 9 months to 12 years approx.
- C** Isofix fastening system, giving the seat extra safety and stability. It can also be installed with just a 3-point seat belt.
- D** The aluminium structure improves protection by 70% compared to traditional systems.
- E** Height and width of the sides of the headrest and the backrest areas are independently adjustable.
- F** Reclining backrest and adjustable armrests.
- G** Maximum protection thanks to the improved large wrap around headrest and side shock absorption.
- H** Seat belt guide means the cars diagonal belt adapts perfectly to the height of the child's shoulder.
- I** Ergonomic design and ventilation maximises comfort.
- J** Smartphone QR barcode for in car fitting videos.
